

Chemical Clear Out

Do you have chemical storage cabinets that need to be cleared out of old chemicals that have out-lived their shelf-life or usefulness, but no time or manpower to take care of it? The ESH&Q Section's Hazard Control Technology Team (HCTT) can arrange to process these chemicals as regulated waste for you. Contact your Environmental Officer (EO). He or she will submit a request to HCTT.

You must:

- Contact your EO
- Identify chemicals to be disposed
- Organize chemicals in one place (one cabinet/shelf if possible) so they are easily identified for disposal

Your EO will need to know:

- Building location
- Waste Generator's name and id #
- Chemical cabinet location/id

Environmental Officers
